

★ PRESIDENTIAL ★  
**DEBATE 2024**  
JUNE 27, 2024 | ATLANTA, GEORGIA

**A COUNTRY FOUNDED FIRST FOR LIFE**

★ **Under the radical Left, U.S. abortion policies are EXTREME compared to the rest of the world.**

- Multiple clinics in the U.S. offer third-trimester abortions without question.
- Every Democrat in Congress, except two, voted to legalize abortion at any stage in pregnancy—even in the seventh, eighth, and ninth months.
- The U.S. is one of only six countries with laws permitting elective abortions throughout all nine months of pregnancy.
- The U.S. is currently more in line with China and North Korea when it comes to abortion policy.
- The Left calls conservatives extreme on this issue but refuses to say at what stage of pregnancy abortion should not be allowed unless the life of the mother is at risk.

★ **The Left's position of abortion on demand, at home, at any time, is far out of touch with the American people.**

- It is **President Biden** and the radical Left who are **extreme on abortion**.
  - **71%** of Americans support legal limits on abortion
  - **Less than one in five Americans (17%)** support the Left's position of taxpayer-funded abortion, without limits, at any stage of pregnancy.
  - **Three in five** Americans say that reducing the number of abortions would be a good thing for the U.S.
- **Six states plus D.C. have NO state-level restrictions on abortion**, while an overwhelming majority of Americans support limits on abortion.

- Women want access to quality healthcare before turning to abortion.
  - **61% favor** government programming encouraging women in difficult situations to give birth rather than abort the child.
  - While the Left pushes women into abortions, America First seeks to provide quality, compassionate medical care for women and babies.

★ **The *Dobbs* decision, two years ago, did not end abortion in America. It returned abortion decisions to their rightful place—the hands of Americans' elected representatives.**

- Despite the scare tactics of the Left, the number of abortions increased in America post-*Dobbs*.
- The *Dobbs* decision is a defense of democracy. The people's elected leaders can decide. If voters oppose their decisions, they can overrule them with referendums or by electing new leaders—that's how our Republic is supposed to work.
- America First's HOPE Agenda calls for policies that provide caring support to women facing various challenges, including unexpected pregnancies, fertility issues, motherhood, adoption, and foster care
- **84%** of Americans agree that providing more support for women in difficult situations facing unplanned pregnancies would be a more effective way to reduce the number of abortions in America than passing stricter abortion laws.

***Policymakers should prioritize greater protection for the two lives involved—the mother and the baby—especially with safeguards to protect women and children from the dangers of late-term abortion.***
