# CHINESE COMMUNIST PARTY LAND OWNERSHIP IS A THREAT TO ARIZONA'S CRITICAL INFRASTRUCTURE

Adam Savit | July 2024

**CHINESE COMMUNIST PARTY (CCP) OWNERSHIP OF LAND IN ARIZONA IS A THREAT TO ARIZONA'S MILITARY BASES AND CRITICAL INFRASTRUCTURE.**

## WHAT IS CRITICAL INFRASTRUCTURE?

Critical infrastructure is any asset that, if incapacitated, would have a debilitating effect on national security, economic security, or public health. Examples include gas and oil pipelines, electrical power grids, military installations, telecommunications facilities, and public transportation systems.

## WHY SHOULD I BE CONCERNED ABOUT CCP ACCESS IN ARIZONA?

CCP acquisition of U.S. land is accelerating. Strategic land near military bases enables surveillance and sabotage, and land near critical infrastructure opens up vulnerable sites like our power, natural gas, petroleum, and water treatment facilities to physical assault. In 2023, a CCP spy balloon traversed the entire continental United States, including our most sensitive military bases. If left open to CCP control, our real property provides nearly limitless platforms for "permanent spy balloons." According to U.S. Air Force Major Jeremy Fox, land near military bases may be used for espionage, including intercepting military communications between unmanned air systems and space-based assets.

## WHAT CRITICAL INFRASTRUCTURE AND MILITARY BASES EXIST IN ARIZONA?

Arizona hosts a significant number of military installations across the state. It is home to three Army bases: Camp Navajo (Bellemont), Yuma Proving Ground (Yuma), and Fort Huachuca (Sierra Vista). The state also houses four Air Force bases, including Barry M. Goldwater Range AFB (Gila Bend), Davis Monthan AFB (Tucson), Luke AFB (Glendale), and Sky Harbor Air National Guard Base (Phoenix). Additionally, Arizona is the location of one Marine base, the MCAS Yuma Marine Corps Base (Yuma). These bases play crucial roles in various aspects of defense and national security, contributing strategic significance within the broader military infrastructure of the United States.

## WHAT CAN ARIZONA DO TO PROTECT ITS CRITICAL INFRASTRUCTURE?

States should ban foreign adversaries from owning or otherwise controlling property within a close radius surrounding a military installation. States should also ensure that all companies with access to critical infrastructure are conducting background checks on employees with significant access to that infrastructure. Finally, states should require the flagging of undeclared transactions, allowing officials and residents of the state to notify the attorney general, and ultimately the federal government, of concerning transactions.
