

WEAPONIZING GOVERNMENT TO PROSECUTE THE AMERICA FIRST MOVEMENT – AND PROTECT CORRUPT ELITES

August 4, 2023

THE ISSUE

It has now been shown the federal government is being weaponized against the America First Movement.

Massive three-letter government agencies attack anyone who disagrees with their radical leftist worldview – and will censor, silence, or suppress, those who support America First policies. But it doesn't stop there. In a calculated one-two punch, the federal government has also been exposed covering up for or hiding crimes committed by those they agree with politically. In fact, government insiders have been shown often to violate internal agency protocols, ignore dissent from within, and break the law to prevent simple questions from being asked or important information from coming to light.

Government should protect the rights granted by the U.S. Constitution to all Americans and not target dissenters for political, financial, or social destruction – nor should it choose to shield a select few from consequences because of a shared leftist world view. This is dangerous and un-American. It must stop now.

THE AMERICA FIRST SOLUTION

End the Two-Tiered Justice System ★ Stop Government Weaponization ★ Ensure Accountability

TOP LINES

★ **Federal government insiders have been caught using their powerful means, methods, and tools to attack average Americans who hold an opinion that differs from theirs.**

- Average Americans are being targeted by a weaponized federal government.
- Three-letter government agencies go after groups and individuals based on their political or ideological views.
- Individuals within the FBI, the Department of Justice, and other agencies have now been exposed for targeting people with whom they disagree.
 - Pro-Life supporters
 - Conservative charities
 - Anyone with deeply held religious beliefs
 - Parents who question what's being taught to their children in school
 - People who question government vaccine mandates
 - Americans concerned about child sex trafficking
- This poses a dangerous, direct threat to our Constitution and our American democracy.

★ **Radical leftists weaponize the government against their political opponents.**

- A man in Chicago was arrested for praying outside of an abortion clinic.
- A man in Virginia was arrested during a school board meeting for protesting the radical transgender policies that led to the rape of his daughter.
- The Department of Justice labeled parents “domestic terrorists” because parents didn’t want their children exposed to sexually explicit material in school.
- The FBI tried to label traditional Christians and Catholics as potential terrorists and dangers to our Country.
- A federal judge ordered the federal government to stop colluding with Big Tech to violate Americans’ First Amendment right to free speech.

- You are censored, silenced, shadow-banned, or canceled if you push actual scientific data that counters junk science on transgender issues, dare to ask questions about the efficacy of the vaccine, and/or believe the information on the Hunter Biden laptop was real.
- Bad actors within the federal government are still targeting a former president of the United States who just so happens to be the chief political rival of President Biden.

★ **While radical leftists within the federal government attack so many with whom they disagree, they ALSO protect the elites who have the same political views.**

- Hillary Clinton stored classified information on her home server, deleted 33,000 emails, and destroyed evidence. **SHE WAS NOT CHARGED.**
- Joe Biden, as a senator and vice president, stored classified information at multiple locations for many years. **HE HAS NOT BEEN CHARGED.**
- Barack Obama, Bill Clinton, and George Bush left the White House with classified documents. **THEY WERE NOT CHARGED.**
- **BUT...**Donald Trump had classified documents at a secure private location with Secret Service protection. **HE WAS CHARGED.**

★ **Federal prosecutors indicted the former president in a matter of months, but three-letter government agencies have known about serious and credible criminal allegations involving the sitting president for years and have done NOTHING.**

- President Trump was impeached for a call to Ukrainian officials about **possible corruption involving then Vice President Joe Biden**; at the exact same time, the FBI had **whistleblower accounts** of a possible bribery scheme involving a Ukrainian energy company and JOE BIDEN – **but NOTHING HAPPENED.**
- Federal investigators have known about the Biden family's foreign business dealings for more than seven years.
- Almost a decade ago, the Obama Administration received warnings about Hunter Biden's business dealings while Joe Biden was vice president.
- FBI reports show a possible \$5 million payment to be spread among multiple LLC's and the Biden family.
- The Congressional House Oversight Committee has uncovered millions in wire transfers between multiple LLC's and up to nine different Biden family members.

★ Selective Prosecution vs. Selective Protection.

LOCALLY

- Far left district attorneys have a warped, radical agenda designed to protect criminals instead of victims.
- A New York district attorney downgraded [52% of felony cases to misdemeanors](#).
- A registered nurse was violently hit by a deranged patient, but the New York district attorney gave the attacker slap-on-the-wrist misdemeanor charge, even though state law says attacks on healthcare workers are a felony.
- A man accused of raping his teenage relative secured a sweetheart plea deal from the Manhattan district attorney—and then went on to allegedly sexually terrorize five people in the Bronx just a month later.
- A New York district attorney cut a break for two women caught on video attacking NYPD cops when he let one of them go and downgraded the charges for the other.
- A store owner in New York was being robbed and physically attacked. He took out a knife to protect himself and stabbed the robber. BUT...the leftist district attorney charged the store owner with a crime.
- These criminals are often repeat offenders, but they are protected by radical leftist district attorneys and rarely punished.
- Too often victims of crimes are becoming victims of the law.

NATIONALLY

- The [New York Post reports](#) the FBI knew Hunter Biden's laptop was real in 2019 and refused to acknowledge that in 2020—in fact, documents show the FBI colluded with the media to characterize the laptop as “Russian disinformation.”
- The House Oversight Committee [reports](#) information from the Hunter Biden laptop, witnesses, bank records, and other sources prove millions of dollars were being transferred from businesses in China, Ukraine, Russia, and other countries to at least 15 shell companies (LLC's) and then to at least nine Biden family members – including payments to one of his **seven** grandchildren.
- The House Ways and Means Committee [stated](#) investigators tipped off Hunter Biden's legal team prior to a search warrant.
- The House Oversight Committee [reports](#) multiple whistleblowers say prosecutors were denied the ability to charge Hunter Biden with crimes in two locations.

- According to [New York Post](#), Hunter Biden was not charged with crimes related to his unregistered foreign business dealings, but prosecutors DID charge a whistleblower about the Bidens for his foreign business dealings just days after the whistleblower made public claims about the Biden family's alleged illegal activity.
- [Newsweek reports](#) according to whistleblower accounts, there could be audio recordings involving then Vice President Biden and his son Hunter talking directly to Ukrainian officials about payments.
- [Real Clear Politics shows](#) Hunter Biden's attorney said that prosecutors never looked at the laptop during their investigation.

This is more than just the protection of the chosen elites and the indictment of a person, people, or group; it is just the latest move by the radical left against the America First movement.

IF PRESSED

★ **This is about MORE than a former president. It's about the American people.**

- A Louisiana judge just ruled that the federal government trampled the First Amendment when it colluded with big tech to censor, silence, and shadow ban ANYONE who dared think for themselves.
- If you posted something on social media that the government didn't like, they told big tech to take it down.
- That's a clear violation of the First Amendment.
- People are being put in jail simply for peacefully protesting abortion clinics or standing up for their kids at school board meetings.

★ **This is not about obstructing justice - it's about equal justice.**

- Hillary Clinton deleted 33,000 emails, which are official government records. She said she had no mobile devices, but she did, and she used software and hammers to destroy mobile devices and other electronics.
- Joe Biden repeatedly said all his mishandled classified documents were turned over, more documents were found in different locations..

★ **No one is above the law – but no one is below it either.**

- The Left is quick to go after those who support the America First policies.
- It's taken more than five years to "investigate" the Biden family, but this still has resulted in no charges, no indictments – and if it weren't for the real investigation by the House Oversight Committee, this story would remain buried.

To combat the increased weaponization of government, the America First Policy Institute (AFPI) is pursuing a comprehensive strategy that seeks to hold those in power accountable, outlines key justice and national security policy reforms, and prepares for an America First administration to rectify the two-tiered system of justice that plagues our nation. This America First approach will provide the solutions needed to restore justice and the rule of law in America.

QUICK STATS

★ Media bias is real.

- The media will cover bad news for the Right but will not mention bad news for the Left.
- From June 8 to July 18 of this year, ABC, CBS and NBC spent **527 minutes** of airtime covering the Trump indictments and **0 SECONDS** of airtime covering the Biden scandal and Burisma.
- The day Devon Archer (former business partner of Hunter Biden) testified to the House Oversight Committee on Joe Biden's involvement in Hunter Biden's business dealings, **CNN** and **MSNBC** mentioned Donald Trump and his investigations a total of **759 times**, but only mentioned Archer and Biden **48 times**.
